

Dear Mother  
I received your letter of the 10th and was  
glad to hear from you and to hear  
that you were all well. I am  
well and hope these few lines  
will find you all the same.  
I have not much news to write  
at present. I am still in the  
same place and doing the same  
work. I hope to hear from you  
again soon.

and the length of the year is a measure  
of the quantity of light and heat received  
from the sun. In the northern hemisphere  
the sun is higher in the sky during the  
summer months and lower during the  
winter months. The angle of the sun's  
rays is greater in the summer and  
smaller in the winter. The length of  
the day is also longer in the summer  
and shorter in the winter. The amount  
of light and heat received from the sun  
is therefore greater in the summer and  
smaller in the winter. This is the reason  
why the temperature is higher in the  
summer and lower in the winter.

no matter how long till we  
get a good bill of exchange  
and you can do so with other  
money that you have in the  
bank of England or in the  
Bank of France or in the  
Bank of Spain or in the  
Bank of Portugal or in the  
Bank of the Netherlands  
or in the Bank of the  
East India Company or in  
any other bank that you  
like to trade with.

Dr. J. G. Mearns, President  
of the American Academy of  
Arts and Sciences, New York  
City, N. Y.  
Dear Sir,  
I have the honor to acknowledge  
the receipt of your letter of the  
10th inst., in relation to the  
above named Academy, and  
in reply to inform you that  
I have no objection to your  
making use of the same for  
the purpose mentioned.

Very respectfully,  
J. G. Mearns

J. G. Mearns
